FAX (760) 354-1068
E-mail: pacificaquafarm@hughes.net

Dear President Kellogg and Commissioners,

I am the owner and operator of a large Tilapia and catfish farm in Southern California. I have been in business for over 30 years. I oppose the fish stocking regulations being set forth by the Fish and Game Department (DFG).

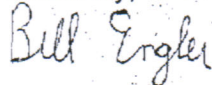

MAILING ADDRESS:
10468 Hot Mineral Spa Road
Niland, CA 92257

First, because it is unlikely that these proposed regulations will provide any real increased protection for wildlife.

Second, because it will cause some aquaculture operations and recreational sites to go out of business due to the prohibitively expensive compliance requirements of the new regulations. This will directly affect the economics of California.

Third, DFG, due to various reasons including under funding and under staffing, is already having trouble enforcing the existing the regulations. How will more regulations help this situation?

Sincerely,

Bill Engler
